- Specification Document: Version 8.6.3 Master Specification
- Target Rendering Artifact: self_referential_processing_protocol-v8_6_3.pdf

1. Deposit Summary

This document records the executive decision and pre-registration authorization for Version 8.6.3 of the self-referential processing protocol.

2. Pre-Collection Deposit Procedure

Step 1: Verify `items_pool_v1.json` SHA-256 digest against locked value `128ff78bb6beb1640fa51897ab97dbb9d07dc56de276973d05a48dda524b53d3`

Step 2: Execute `api_ping_check.py` against live model endpoints and record `api_ping_check.json`.

Step 3: Deposit `self_referential_processing_protocol-v8_6_3.pdf` and `items_pool_v1.json` on OSF.

Step 4: Execute independent local byte hash check (`sha256sum items_pool_v1.json`).

Step 5: Perform visual page spot-check on rendered PDF.

Step 6: Freeze repository and mint time-stamped OSF registration DOI prior to candidate model evaluation.

HASH: `128ff78bb6beb1640fa51897ab97dbb9d07dc56de276973d05a48dda524b53d3`
